U.S. Work Authorized | No Sponsorship Required | Open to Remote & Travel

PROFESSIONAL SUMMARY

Early-career Software Engineering & Data Analytics Professional with an M.S. in Information Systems Management and hands-on experience building scalable data pipelines, statistical models, and software tools using Python (OOP), SQL, BigQuery, and JavaScript. Proven ability to analyze 10M+ operational records, engineer predictive models, and optimize logistics workflows. Hold WorldQuant University credentials in **Data Science Application** and **Data Science Modeling** alongside Google Professional Certificates..

TECHNICAL SKILLS

Programming & Core Tech: Python (Object-Oriented Design, Data Structures), JavaScript (Intermediate), SQL, BigQuery, HTML/CSS | **Software Development & Tools:** Git, GitHub, Version Control, Google Colab, Jupyter Notebook, Automated Scripting, Unit Testing / Model Evaluation

Data Engineering & Analytics: Data Cleaning, Feature Engineering, Exploratory Data Analysis (EDA), Statistical Testing (Chi-Square, Cramér's V), Machine Learning (Scikit-learn, Logistic Regression, Random Forest)

Visualization & Business Intelligence: Tableau, Power BI, Matplotlib, Dashboard Automation

EDUCATION

Master of Science in Information Systems Management (Project Management)

DeVry University, Keller Graduate School of Management | Cumulative GPA: 2.75+

Bachelor of Public Administration (Economic Development)

African Methodist Episcopal University (WES Evaluated)

CERTIFICATIONS & CONTINUING EDUCATION

- **WorldQuant University: Applied Data Science Lab — Credential Badges:** *Data Science Application & Data Science Modeling*
- **Google Professional Certificates:** Data Analytics Professional Certificate | Business Intelligence Certificate
- **CISCO Networking Academy:** JavaScript Essentials 1 & 2 (Intermediate OOP Concepts) | Data Analytics Essentials
- **Tableau Software:** Tableau Visualization Certificate

TECHNICAL & SOFTWARE ENGINEERING PROJECTS

GA4 Ecommerce Analytics & Machine Learning Pipeline | *SQL • BigQuery • Python • Scikit-learn*

GitHub Repository: [udekontee/GA4-Ecommerce-Analytics-Purchase-Prediction](https://github.com/udekontee/GA4-Ecommerce-Analytics-Purchase-Prediction)

- Processed and engineered behavioral features across **4.29M+ event records** and 270K users in **Google BigQuery using complex SQL queries**.
- Wrote modular, reusable **Python scripts applying Object-Oriented principles** to clean data, perform statistical tests (Chi-Square, Cramér's V), and automate data transformation.
- Built, evaluated, and unit-tested predictive machine learning models using **Scikit-learn**, achieving **0.888 ROC-AUC** with Logistic Regression.
- Utilized **Git and GitHub** for version control and documented project architecture for collaborative code reviews.

Cyclistic Bike-Share Logistics & Usage Analysis | *Python • Pandas • Matplotlib • Data Analysis*

GitHub Repository: [udekontee/Cyclistic-Bike-Share-Analysis](https://github.com/udekontee/Cyclistic-Bike-Share-Analysis)

- Built Python data processing workflows to merge, validate, and analyze **6.1M+ trip records** across 12 months of operational data.
- Evaluated customer usage patterns by rider type, trip duration, and seasonal trends to optimize resource allocation and membership conversion strategies.
- Visualized high-density operational data using Matplotlib to translate technical data findings into executive recommendations.

PROFESSIONAL & LOGISTICS EXPERIENCE

Amazon | *Fulfillment Operations Associate* | *Active Assignments: Nov 2019 – Present (GA, MD, PA)*

- Processed high-volume customer orders using enterprise warehouse management software, meeting daily productivity, accuracy, and safety targets.
- Navigated inventory tracking systems to resolve scan errors and maintain supply chain workflow efficiency across facility operations.
- Collaborated with associate teams and shift leads to identify inventory bottlenecks and support fast-paced fulfillment goals.

Progressive Turnout Project (RE) | *Customer Service & Field Representative* | Jan 2024 – Jan 2025

- Managed high-volume outreach using CRM systems and automated communication tools (100+ interactions/shift) with high data entry precision.
- Communicated complex information clearly, de-escalated sensitive issues, and guided users through structured administrative procedures.
